Photo Facial

It is a medical facial utilizing the properties of IPL (intense pulse light) laser which has scientifically proven collagen boosting and facial rejuvenation properties.

Photo facials help in treating a number of skin conditions like brown spots; sun damaged skin, facial redness, and open pores; improves skin texture and reduces fine lines. Each session lasts for about fifty minutes and number of sessions required depends on your skin condition. Results of photo facial are instant and at the end of the session your skin looks rejuvenated and brighter. With subsequent sessions, skin looks younger and more nourished.

Permanent Makeup

Permanent makeup is a cosmetic technique which employs tattoo (permanent pigmentation of the

dermis) as a means of producing designs that resemble makeup, such as eye lining and other permanent enhancing colors to the skin of the face, lips, and eyelids. It is also used to produce artificial eyebrows, particularly in people who have lost them as a consequence of old age or disease and to disguise scars and white spots in the skin such as in vitiligo. All the cosmetic re-pigmentation surgeries are done under local anesthetic or topical anesthetic application after all medical reports are checked by the doctor or by the clinic. At Dr. Nivedita Dadu's Dermatology Clinic, we use BioTouch products for Semi-Permanent Make-up Treatment.

Dermalogica Spa Facials

Skin is an excellent record keeper. Sun bathing, smoking, late nights and cocktails seem like a fun idea now but that starlet lifestyle will

show up on your skin 10 years from now. Redefine your skin's health with our innovative and customized Dermalogica Spa Facials, specially designed for your skin concerns- Anti-Aging, Anti Acne & Whitening facials. Dermalogica Spa Facial includes exfoliation, double cleansing of skin, extraction, tailor made customized massage and masque technique. With the products that are unequaled, you are going to see your skin glowing, more luminous and hydrated. Quite honestly it's going to be in its optimum condition; the best you've ever had.

Body Polishing

Keep your skin looking at its complete best with maximum radiance with Skinology's Body Polishing and exfoliation

treatments. With this treatment, all dead skin cells and surface impurities are removed and it results in a smooth, bright and radiant complexion. It includes micro dermabrasion which exfoliates dead pigmented cells, followed by a rejuvenating massage and a de-tanning pack. At the end of the session the skin will look shiny, polished and

Dermalogica Peel

Experience the power of BioActive Peel, a powerful new skin resurfacing system. It helps reduce acne, pigmentation and signs of

premature aging to reveal smoother, brighter and softer skin. Chemical peels are one of the most popular professional skin care services today because they can improve the quality, texture and color of skin. But they can also produce severe side effects such as inflammation, discoloration and scarring for up to several months. With BioActive Peel, you can get the same powerful results without the associated risks or downtime. BioActive Peel safely removes dull outer layers of skin and helps the skin underneath regenerate for a smooth, radiant complexion. It can be tailored to address skin roughness, signs of photodamage, fine lines and wrinkles, acne breakouts, skin congestion, some forms of hyperpigmentation and unbalanced skin tone. You will typically notice a dramatically improved skin quality, texture and tone within three treatments.

Oxypeel Jet Facial

A revolutionary approach that utilizes the properties of jet technology, infusing oxygen and saline into the skin cells, using a specially

designed microjet hand piece. Unlike chemical peel, oxy peel works by biologically exfoliating your dead cells thereby imparting oxygen into the basal layer of the skin, where new skin cells are being generated.

Benefits:

- Exfoliates
- Hydrates
- Oxygenates skin cells
- Rejuvenate skin
- Reduces Fine lines and wrinkles
- Brighter skin tone
- Helps reduce acne
